

ZWE MHAN HTET (ERICK BOYLE)

SOFTWARE ENGINEER | FULL-STACK & MOBILE DEVELOPER

Yangon, Myanmar | +95 9792627041 | zwemhanhtet2004@gmail.com | <https://erickboyle.website>

PROFESSIONAL SUMMARY

Software Engineer specializing in production-oriented web and mobile applications across full-stack environments. Proficient in Laravel/PHP, Flutter/Dart, React Native, Vue, and JavaScript/TypeScript. Experienced across the entire development lifecycle from API integrations and business workflows to Android release management and localization. Seeking opportunities to take ownership of features from implementation to release while advancing skills in backend architecture and system design.

TECHNICAL SKILLS

Languages	PHP, Dart, JavaScript, TypeScript
Backend	Laravel, Node.js, REST APIs
Frontend	Vue 3, React, Next.js, Bootstrap, Tailwind CSS
Mobile	Flutter, React Native, Expo
Databases	MySQL, PostgreSQL, MongoDB
Tools & Eng.	Android SDK, ADB, Git, VS Code, Postman, TablePlus, state management, API integration, release management

PROFESSIONAL EXPERIENCE

Full-Stack & Mobile Developer Rent 2 Own (Full-Time) & Freelance	2025-Sept 2026
- Managed full-time development responsibilities at Rent 2 Own, building and maintaining comprehensive projects using Flutter, React Native, Laravel, and Vue. - Executed concurrent freelance contracts, delivering complete full-stack web applications, mobile app builds, and backend system updates from scratch. - Built customer-facing application flows featuring dynamic form fields, document uploads, and business-specific validation logic. - Managed complex application states utilizing Cubit/BLOC within a structured, feature-based architecture. - Troubleshoot API, Android build, and release issues across development and testing environments. - Drove Android application delivery by handling signing, debugging, and Play Console release preparations.	

Freelance Developer & IT Student / Client & Personal Projects	2022-2025
- Undertook extensive IT training while simultaneously delivering portfolio projects, app updates, and backend services for diverse clients. - Engineered backend features, REST APIs, and database integrations to support core application business logic. - Developed reusable mobile and web interfaces focused on practical UX and long-term code maintainability. - Built and maintained web and mobile applications leveraging Laravel, CodeIgniter, Flutter, and modern JavaScript frameworks. - Utilized Git workflows for robust source control, branch management, and deployment preparation.	

SELECTED PROJECTS

- Mechanic Platform (Laravel, Vue 3, React Native/Expo, MySQL, REST API):** Developed service-status logic, approval workflows, and API integrations for a production service management platform utilized by customers, mechanics, and staff.
- Merchant Application (Flutter, Dart, REST API, Android):** Built a business app with OCR flows, referral systems, and localized UI, handling everything from feature implementation to Android releases.
- Training Platform (Laravel, Vue, MySQL, REST API):** Created an administration system managing backend services, database-backed workflows, and web interfaces.
- Mobile & Portfolio Projects (Flutter, React Native, AI APIs):** Experimented with AI-assisted workflows and external API integrations across multiple client and portfolio apps.

EDUCATION

Royal Myanmar Institute of Technology (RMIT), Yangon	2022-2023
IT Training/Foundation Courses	
Genki (ITPEC Preparation)	2022-2022
Information Technology Passport (IP) & Fundamental IT Engineer (FE)	

ADDITIONAL PROFESSIONAL INFORMATION

- **Localization:** Extensive experience with Myanmar-language application interfaces and Unicode/Zawgyi considerations.
- **Development Practices:** Proficient in Git branching, staging environments, API debugging, and release troubleshooting.
- **Interests:** Full-stack engineering, backend architecture, automation, and practical AI-assisted development.
